

Foo.java

```
class Foo {  
    int x;  
    float y;  
    Foo(int mx){  
        x = mx;  
    }  
  
    float getY(){  
        return y;  
    }  
}
```

Main.java

```
class Main{  
    public static int main(int argc, String argv[]){  
        foo f = new Foo(0);  
        System.out.println(f.getY());  
    }  
}
```
